

# LLED8000-CMI PRODUCT LAUNCH JANUARY 2020

# THE ALL NEW LLED8000-CMI

CALI proudly introduces LLED8000-CMI to the *lip*LEDs Series. LLED8000-CMI is a new slim profile corner mud-in solution designed to be seamlessly integrated along the outer edge of two perpendicular surfaces.

LLED8000-CMI has a unique 0-10V dimming capability and performs at very high output. LLED8000-CMI has an impressive Color Rendering Index greater than 95.

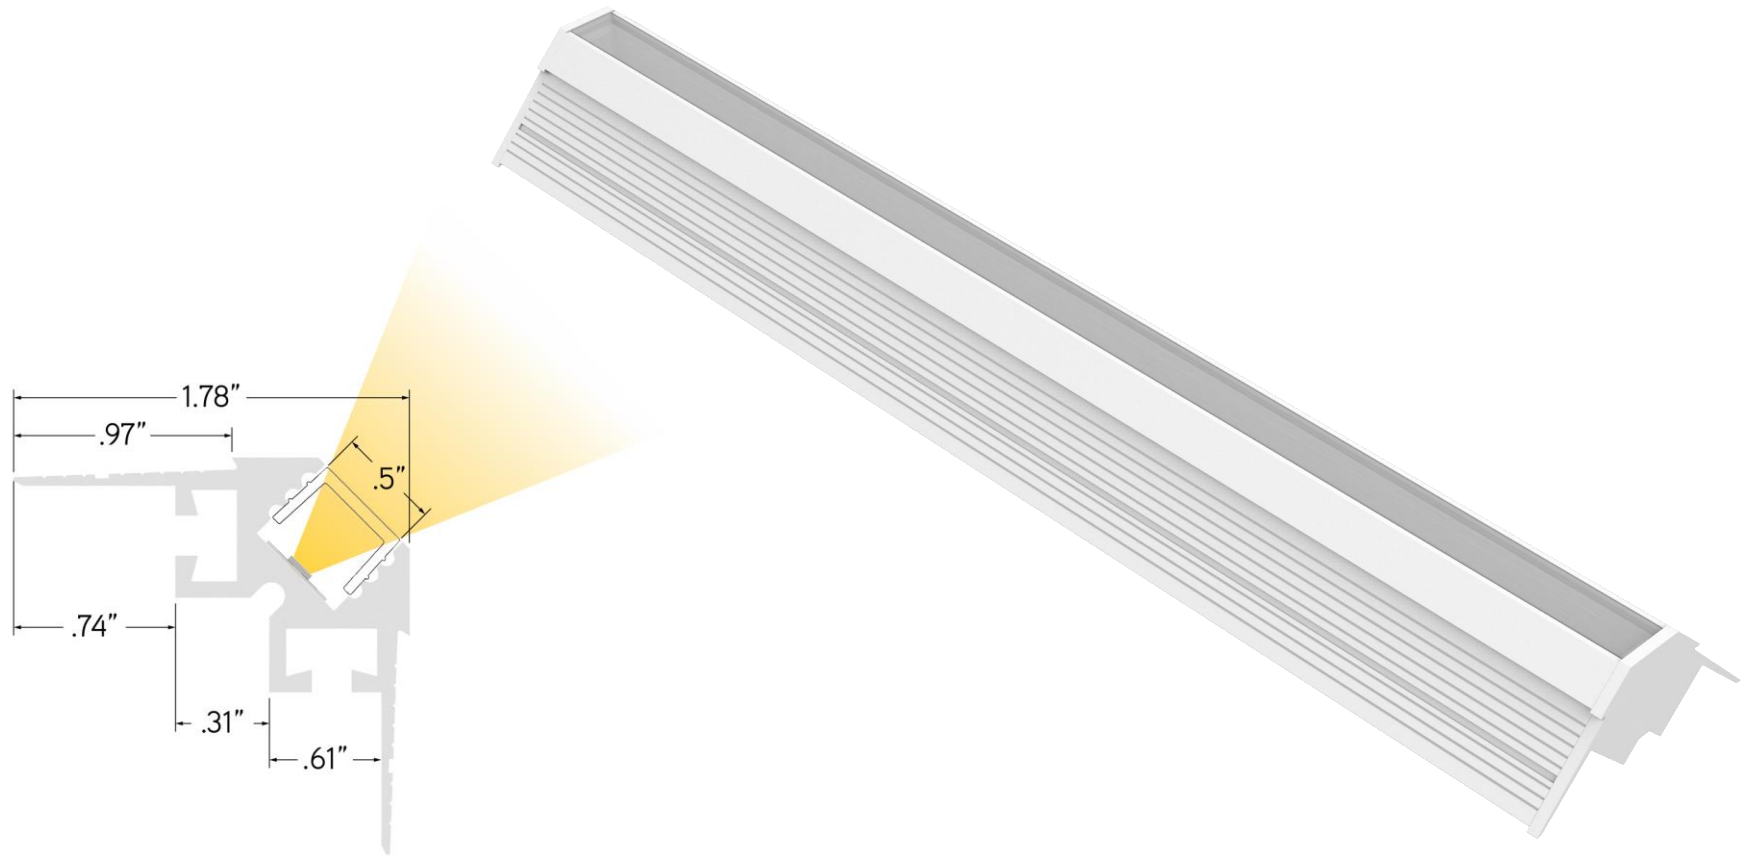

LLED8000-CMI presents innovative features:

- Slim profile mud-in extrusion
- Stunning edge beam of light
- Vertical mud-in integration from wall to wall
- Dry, damp, or wet location

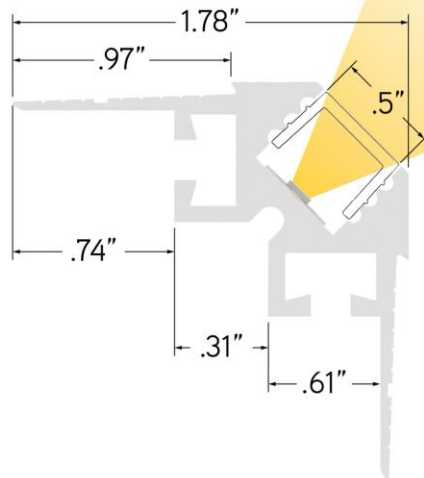

# SLIM PROFILE

LLED8000-CMI offers a slim profile extrusion that extends the multitude of installation capabilities in numerous types of edges.

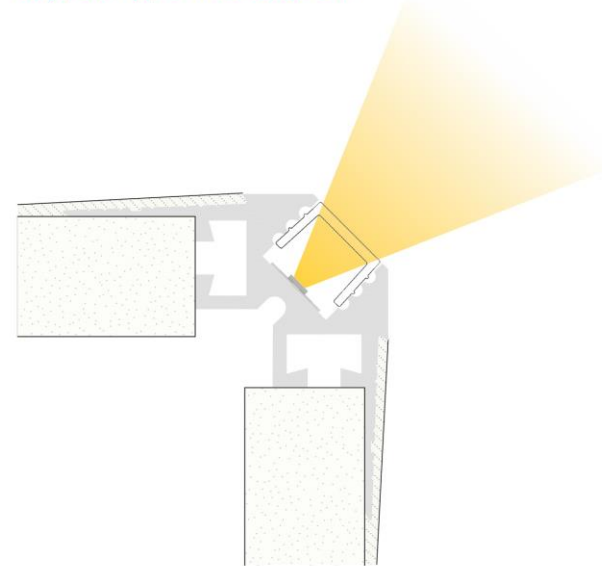

# SEAMLESS INTEGRATION

LLED8000-CMI flawlessly integrates to the edge of two perpendicular joined surfaces, vertical wall to wall. The concealed extrusion is thoughtfully designed to create a stunning beam of light along the edge. LLED8000-CMI creates a very distinguished look in a design space and accomplishes an inviting atmosphere.

**VERTICAL WALL TO WALL MUD-IN**  
Dry, Damp, or Wet Location
