

LLED8000-MW PRODUCT LAUNCH MARCH 2020

THE ALL NEW LLED8000-MW

CALI proudly introduces LLED8000-MW to the *lip*LEDs Series. LLED8000-MW is a slim profile wall mud-in solution designed to be seamlessly integrated onto wall surfaces to provide the most stunning line of light.

LLED8000-MW has a unique 0-10V dimming capability and performs at very high output. LLED8000-MW has an impressive Color Rendering Index greater than 95.

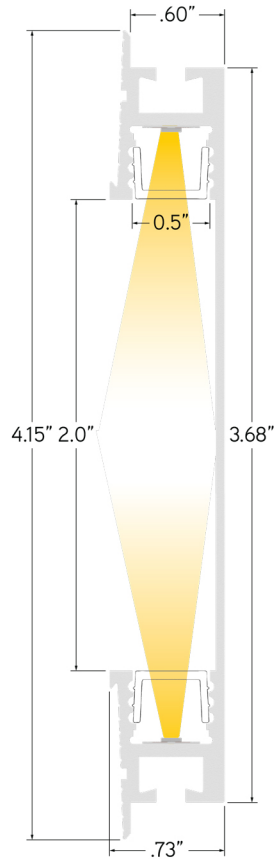

LLED8000-MW presents innovative features:

- Slim profile mud-in extrusion
- Beautiful line of light with a concealed lens
- Top and bottom LED light strip
- Dry and damp location

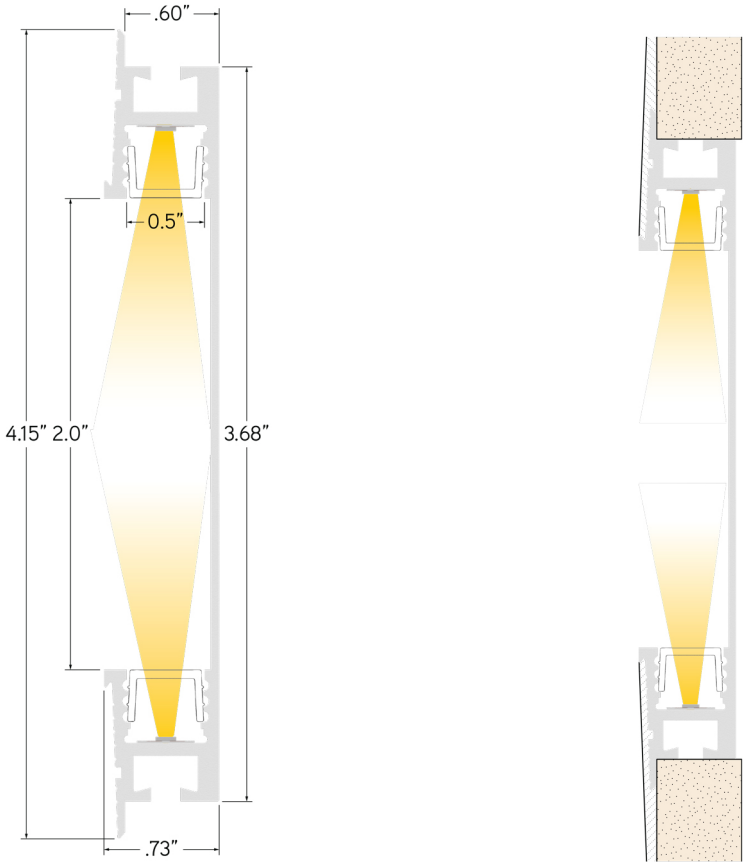

SLIM PROFILE

LLED8000-MW offers a slim profile extrusion that extends the multitude of installation capabilities in numerous types of wall spaces and hallway or path designs.

SEAMLESS INTEGRATION

LLED8000-MW flawlessly integrates onto the wall, while the extrusion remains fully concealed after mud-in installation. LLED8000-MW creates a very distinguished look in a design space and accomplishes an inviting atmosphere.
