

# LLED8000-SMI PRODUCT LAUNCH NOVEMBER 2020

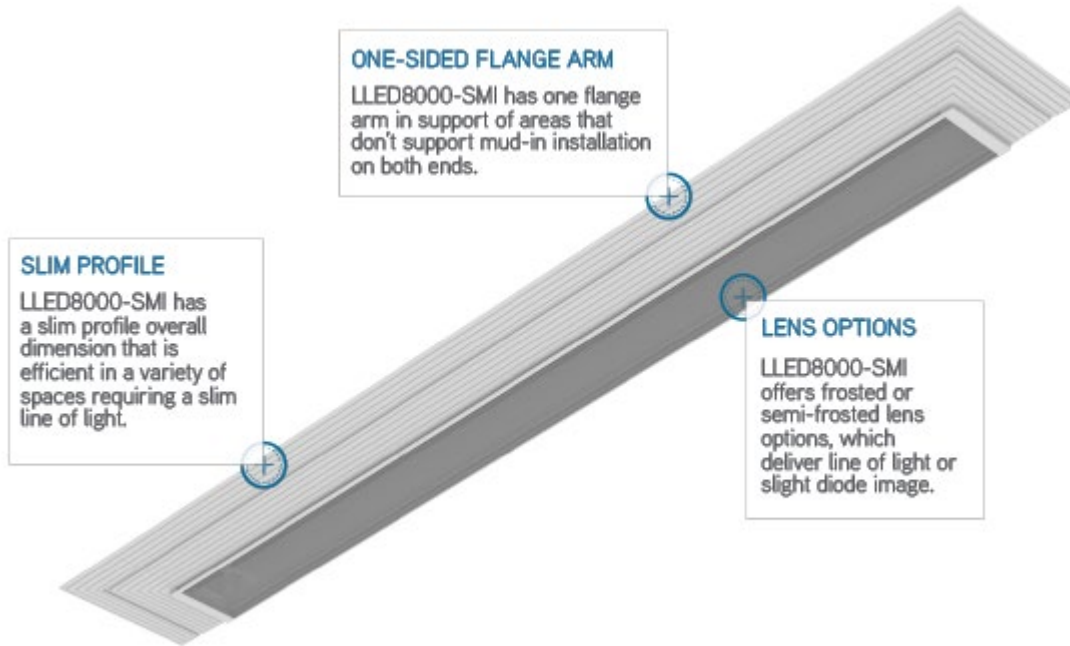

## A SLIM BUT POWERFUL PERIMETER MUD-IN SOLUTION.

We proudly introduce LLED8000-SMI to the lipLEDs family. LLED8000-SMI is a slim profile integrated linear lighting system strategically designed for one sided mud-in applications. LLED8000-SMI delivers a stunning line of light and is effective in making design concepts come to life with a variety of options such as color temperatures, watts per foot and finish options.

# FEATURES

LLED8000-SMI is designed with efficient features to achieve the best seamless and integrated application. Due to the flexibility that is needed with mud-in luminaires for a variety of architectural design spaces, LLED8000-SMI now caters to those needs.

☼ DRY/DAMP LOCATION | CEILING TO FLOOR

☼ DRY/DAMP/WET LOCATION | CEILING TO WALL

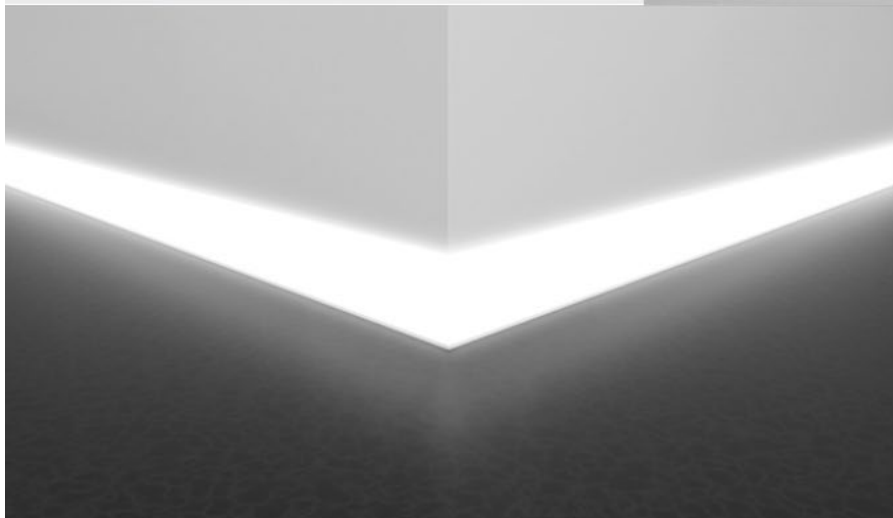

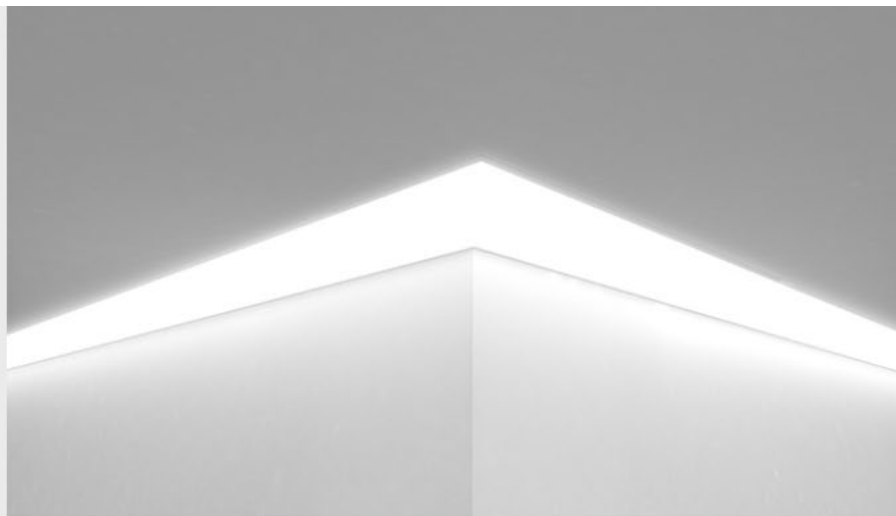

# FACTORY-BUILT CORNERS

## 90° EXTERNAL CORNER

Perfectly engineered to solve dark spots in external corners of wall to ceiling perimeter continuous runs.

**LLED8000-SMI-90D-INC**

## 90° INTERNAL CORNER

Thoughtfully designed to maintain a seamless line of light in internal corners in wall to floor continuous runs.

**LLED8000-SMI-90D-INW**

# FACTORY-BUILT CORNERS

## 90° INTERNAL CORNER

Engineered for wall to ceiling continuous runs along internal corners to preserve a seamless line of light.

**LLED8000-SMI-90D**

## 90° INTERNAL CORNER

Thoughtfully designed to maintain a seamless line of light in a variety of design spaces.
