1. Measure area where fixtures will be installed. Use a chalk line to ensure a straight installation.
2. Determine the number of spring mounting clips needed.
Note: Use 2 clips per fixture segment under 6'. Use 3 per fixture segment 6' and longer.

3. Slide spring clips into fixture segments.

4. Pinch spring-loaded arms together and insert into pre-cut recess.

5. Release spring-loaded arms, allowing the spring tension to pull fixtures into place.
